Wavelink Industrial Browser TE 6.0

Long gone are the days when browsers simply provided web access for the road warrior. Demand is emerging for web accessible intelligent data collection and communication functions. Businesses are also finding significant advantages in deploying web-based applications as they provide for great flexibility in terms of data presentation and application maintenance. Businesses have discovered the need for an industrial browser. Today's industrial browser must support mixed hardware and emulation environments, maximize the productivity of mobile workers, minimize support and administration costs, and provide a seamless migration, from legacy applications to today's web-based solutions.

The Wavelink Industrial Brower provides functionality for all aspects of device management and supplies the necessary tools through one consistent GUI. Benefits such as the operating system lockdown/Software-based Input Panel control and the custom keyboard mapping make the method of providing web access more appealing than ever. In addition, when *Avalanche* for remote device configuration, *CE Secure* for added device and data security, and *Remote Control* for a troubleshooting/helpdesk solution are layered, the result is the most significant solution set available today. The Wavelink solution is untouchable when it comes to client configuration management, device-side diagnostics, advanced scripting, security and web integration. The Wavelink Industrial Browser is the most flexible, scaleable and reliable choice in the marketplace today.

GENERAL FEATURES:

- Operating System Lockdown & Software-based Input Panel control
- Multiple Browser Sessions Capability
- JavaScript Support for Barcode Scanning, MSR and RFID Reader
- Printer Support via META Tags and JavaScript
  Supports JavaScript Events: On-scan, On-RFID, and on Key Press
- Supports JavaScript Objects: Scanner Enable/Disable, Symbology Configuration, Printer Configuration, Printer Print String and Printer TCP
- Supports Full Screen Mode
- Supports Context Menus
- Hardware Key Mapping to Events & URLs
- Special URL Commands: Hide/Show Software-Based Input Panel, Quit, Back, Forward, Home, Refresh and Text Size.
- Manipulate, Validate and Parse Barcode Scan Data

Wavelink Industrial Browser TE 6.0

- Color RF Signal & Battery Level Indicators
- Supports Windows Mobile 2003, Windows Mobile 5.0, Windows XP , CE.NET 4.2, and CE.NET 5.0

DIFFERENTIATING FEATURES:

- Wireless Client & Configuration Updates
- Hot Key Between Emulation & Browser Sessions
- Out of Range & Roaming Support
- Advanced Scan Handling
- Access List to Prevent or Limit External Web Sites
- HTTP and HTTPS Proxies

FEATURES

Provide for a Seamless Migration – The Wavelink Industrial Browser allows for the introduction of new web applications for a broad base of Wavelink Emulator users. Because the Wavelink Industrial Browser shares its User Interface with Wavelink TE 6.0, existing TE users can be trained quickly to utilize industrial web applications. Over time, this allows for a seamless migration from traditional applications to new applications while using the Wavelink standard client user interface and configuration methodology.

Mixed Hardware & Emulation Environment Support – The vendor-agnostic Wavelink Industrial Browser provides built in support for existing emulation environments. While migrating to newer devices and technologies, existing infrastructures may be preserved. Also, support may be integrated for reading RFID data side by side with bardcode and other data collection information from scanners and readers. Running multiple emulation and browser sessions concurrently (i.e. 3720/5250 and VT/HP) from the same device is also available.

Maximize the Productivity of Mobile Workers – OS lockdown/SIP control is integrated into the Wavelink Industrial Browser. Also, Access Lists may be enabled and this prevents users from unnecessarily entering certain external Web sites. Also, the use of hot keys, JavaScript device/events/peripherals configuration & control, multiple browser sessions, context menus, hardware key mapping and signal/batter level indicators are included and lend themselves well to increasing the efficiencies of on-screen navigation and use of the device.

Wavelink Industrial Browser TE 6.0
STRATEGY

The Wavelink Industrial Browser will be positioned as a standalone browser, as an addition for existing Wavelink Emulation users, or for new customers. Existing maintained customers will be migrated to the new product at a discounted charge. If un-maintained customers would like to take advantage of the new features, they will be charged for the TE 6.0 Standalone Browser as described in the Pricing section.

LIST PRICE/CONFIGURATION

A fee will be charged for the Wavelink Industrial Browser. Also, annual maintenance is strongly recommended, entitling customers to unlimited technical support and all software updates/upgrades.

Wavelink Part #	Description[1,2,3]	Price
120-LI-WIBSTO	Wavelink Industrial Browser – Standalone	$89.00
120-MA-WIBSTO	Wavelink Industrial Browser – Standalone Maintenance	$17.80
120-LI-WIBAOM	Wavelink Industrial Browser – Add-on for Maintained TN Licenses[4]	$49.00
120-MA-WIBAOM	Wavelink Industrial Browser – Add-on for Maintained TN License Maintenance	$17.80
120-LI-WIBWP2	Wavelink Industrial Browser with purchase of TN 2-in-1 License[5,]	$34.00
120-MA-WIBWP2	Wavelink Industrial Browser with purchase of TN 2-in1 License Maintenance	$6.80

1) Wavelink Emulators consist of client side software only. Emulators may be purchased in either a 2-in-1 package or a 4-in-1 package (includes 5250/3270/VT/HP all in one emulator). Customers may select their specific 2-in-1 emulator post purchase at the time of registration.
2) Annual fee and contract allows unlimited phone support and access to product updates and upgrades. If a customer purchases Wavelink software and does not purchase Wavelink Maintenance within 12 months of the initial purchase, the customer must purchase an "Upgrade" to receive phone support or product updates/upgrades.
3) The Wavelink Industrial Browser is available for Wavelink TN version 6.0 and newer.
4) This license includes maintenance for the first year.
5) This license is only available with an initial purchase of a Wavelink TN client
